

Is your industrial equipment protected from power surges or failure?

INDUSTRIAL BACK UP POWER SOLUTIONS

Securing comprehensive power protection and management can prove a difficult task in harsh industrial environments. Specialised Eaton UPS solutions from YHI will protect your industrial systems against a full range of power problems, even under the most strenuous of circumstances.

"What is the cost to your business in the event of power failure?"

Industrial UPS & Power Protection

Our experienced UPS engineers can design an Eaton industrial UPS solution tailored to suit your specific requirements.

Industrial UPS Service & Support

Installation, commissioning and preventative maintenance are equally as important as choosing the correct UPS. To ensure you get the best return on investment we offer a comprehensive range of services tailored to suit your requirements.

Eaton Is A Leading Diversified Power Management Company

Many major airports, international oil companies and other large industrial service providers have deployed Eaton UPS solutions. With over fifty years of UPS manufacturing experience, Eaton is the second largest UPS manufacturer in the world.

- Premium-quality, highly reliable industrial UPSs designed specifically for the rigorous demands of an industrial application environment
- Award-winning power management software solutions to proactively monitor and manage your crucial systems
- World-class service offerings deliver the peace of mind that your industrial systems are always protected
